Linda Liu

Junior Web Developer | UX UI Designer

Vancouver, BC | Email: lindacodesdev@gmail.com | Github | LindaDev.com

Technical Skills

Web Development

- Front-End: JavaScript, HTML, CSS, Python, React
- Back-End: Learning Node.js,and REST APIs
- Databases & Cloud: SQL, Firebase
- Others: Git, GitHub, Figma, Adobe Illustrator, Adobe Photoshop, Canva

Projects

Budget App

- Built a responsive budget tracking app using JavaScript
- Implemented features to add, edit, and delete categories, income and expense entries
- Goal limit and total spending
- Designed a clean, web and mobile-friendly UI for easy daily use

Portfolio Website

- Designed and developed a personal portfolio using React and CSS
- Showcased projects with responsive layout and smooth navigation
- Optimized performance and mobile usability

Education

Full Stack Developer Path, Scrimba - *Certificate*
(In Progress - Expected Summer 2026)

Designed and developed responsive web applications using HTML, CSS, JavaScript, and React. Learned Node.js, Express, TypeScript, and SQL. Built and deployed full-stack web applications using React and REST APIs, with hands-on experience in database design and backend development. Explored AI engineering concepts through small integrations to enhance application functionality.

Introduction to Programming, Udacity - *Certificate*
November 2024

Built a strong foundation in programming using Python and JavaScript. Gained experience with core concepts including variables, data types, conditionals, loops, functions, and basic data structures. Applied version control using Git and GitHub, and developed hands-on projects such as simple applications and interactive web pages.

Google UX Design, Coursera - *Certificate*
January 2023

Learned the end-to-end user experience design process, from empathizing with users and defining pain points to ideating, prototyping, and testing solutions. Built wireframes and high-fidelity prototypes in Figma while applying principles of accessibility and inclusive design. Conducted user research and usability testing to inform design decisions.

Bachelor of Science in Computer Science - *BFA CS degree*
(starting 2027~2028)

Learning programming such as Java, C++, data structures, and algorithms, along with core concepts in systems, databases, and software engineering. It also includes math foundations and exposure to AI and networking, combining theory and practical skills for software development careers.

Experience

DearDesires, Burnaby - *Founder & Owner, Product Design & E-commerce*
January 2020 - October 2023

- Customized and maintained e-commerce websites using Shopify, HTML, and CSS.
- Troubleshooting and resolving website content, layout, and functionality issues.
- Optimized website SEO and user-facing content to improve search visibility and user engagement.
- Applied A/B testing to evaluate and optimize website performance, user engagement, and conversion metrics.

- Worked with multiple software platforms and third-party integrations, including Shopify, Etsy, Amazon, Omnisend, and QuickBooks.

Angel Canada Enterprises Ltd., Burnaby - *Marketing & Operations Specialist*
July 2014 - August 2015

- Provided technical support and product demonstrations to customers via phone, webinars, and on-site meetings.
- Maintained and updated company website content, images, and code using Dreamweaver.
- Managed data entry, documentation, and business processes while ensuring accuracy and efficiency.
- Collaborated with clients to understand requirements and deliver effective solutions.
- Translated technical documentation and user manuals between English and French.

- Created and maintained digital content and marketing assets using web and design tools.
